

## Chevron, Midland

### Arion Wall Unitized Curtainwall System

Chevron Midland Campus is located in Midland, TX. The Class A Office building consists of two 4-story buildings connected by a walkway, a fitness center, a cafeteria, a training facility, and a central plant, totaling 340,000 square feet. The campus will support Chevron's goal of providing a world-class facility for its West Texas Permian Basin operations, allowing them to attract new employees and support future growth in Midland. The buildings' enclosure is constructed of a unitized, high-performance curtain wall system featuring DMD Weathering Steel. The glazing is high-performance gold reflecting insulated glass with integral copper screen. Chevron Midland Campus achieved Leadership in Energy and Environmental Design (LEED) gold-level certification for meeting specific sustainability and energy efficiency standards in green building design.
