

Square 37, District of Columbia

Accunit Fixed Window System

The development includes a high-end residential building containing 71 condominiums, 93 apartment units, common area amenities, and a rooftop pool. The building's unique façade features a uniform stepping design containing a dual layer of exterior skin with curtain wall and an aluminum window wall.

The West End Square 37 project is designed to achieve LEED® Gold Certification and features a green roof to aid in the building's stormwater management.
